OVERVIEW

The Problem & Our Solution

THE PROBLEM

- Long PDFs take hours to read, cross-reference, and act on manually.
- Summarizing, editing, e-signing, and quizzing each need separate, disconnected apps.
- No shared, live workspace for teams to actually collaborate on a document together.
- Generic AI chat gives answers with no way to verify they're grounded in the source.

OUR SOLUTION

- One platform to chat, summarize, quiz, edit, sign, redact, and collaborate on any PDF.
- Every AI answer is cited and clickable — jump straight to the exact source page.
- Live team workspaces, an AI agent, automations, and a public developer API.

BUILT WITH

React 19 + TypeScript

FastAPI + WebSockets

Google Gemini + LangChain

FAISS Vector Search

PostgreSQL

Stripe Billing

Docker on Render + Vercel

Features & Standout Innovations

CORE FEATURES

Chat, Summaries & Quizzes

Ask questions with citations, generate study notes, quizzes, flashcards.

PDF Editor Suite

Click-to-edit text, e-signatures, form filling, OCR, AI rewriting, PII redaction.

AI Agent & Automations

Plans and executes multi-step goals; trigger-based workflows on upload.

Team Workspaces

Shared documents, team chat, and live collaborative cursors.

STANDOUT INNOVATIONS

AI Audio Overview

Two-host podcast-style discussion of any document, spoken aloud.

Knowledge Graph

Auto-extracted entities & relationships as an interactive graph.

Live Collaborative Cursors

Real-time WebSocket presence on shared documents.

Click-to-Locate Citations

Click a citation to jump to and highlight the exact source page.

Architecture, Live Demo & Thank You

Client

React SPA (Vercel)

API

FastAPI REST + WebSocket (Render, Docker)

Data

PostgreSQL + in-memory vector store

AI

Google Gemini + FAISS

Live Demo
